

April 19, 2013

To BioChem Technology (Shanghai) Co.,Ltd.

This document is to certify that Bioprocess Intelligent Optimization System (BIOS), Bioprocess Aeration Control System (BACS) and online analyzers, which were all provided by BioChem Technology (Shanghai) Co.,Ltd., have been installed and are operational in Phase II project of Yangzhou Liuwei Wastewater Treatment Plant since March, 2011. During these two years, both control systems were operating constantly with high reliability, which has achieved around 20% energy consumption reduction for aeration. This project was also awarded the third place of "Environmental Protection Science Improvement in Jiangsu Province" in July, 2012.

Therefore, we would like to appreciate all the excellent work BioChem Technology has accomplished in this project, and look forward to having your updated Bioprocess Control systems implemented in Yangzhou Liuwei Wastewater Treatment Plant Phase III expansion project.

Sincerely,

Jieyuan Draining Co., Ltd, Yangzhou, Jiangsu Province, China
